RIDHI GUPTA

Full Stack & AI Developer
Jalandhar, Punjab, India | +91 7340974710 | ridhigupta250906@gmail.com
LinkedIn | GitHub | Portfolio | Instagram | X

SUMMARY

Computer Science (AI) undergraduate and full stack developer who ships complete web applications, from Next.js/React frontends to PostgreSQL and FastAPI backends, including real-time multiplayer and AI-assisted data platforms. Web Developer at IuXoa. Microsoft Azure AZ-900 certified (928/1000). Seeking a full stack or AI/data software engineering internship.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, C, C++
Frontend: React, Next.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: PostgreSQL, MySQL, MongoDB, Supabase, Prisma
AI / Data: AI/ML, data processing, data analysis, data visualization
Cloud & Tools: Microsoft Azure, Docker, Git, Streamlit, Vercel

EXPERIENCE

Web Developer | IuXoa Apr 2026 – Present

- Engineered frontend and backend features across 5+ web and game-based applications in the product portfolio.
- Integrated authentication, multiplayer networking and profile management across 3+ projects, working with frontend and backend teams.
- Designed responsive, cross-device interfaces for 10+ application screens using HTML, CSS and JavaScript.
- Debugged and tested 20+ delivered features, resolving performance issues found during release cycles.

PROJECTS

SANKET × CivicLens | AI-powered civic signal intelligence platform Full Stack • AI • Data

- Developed a Supabase-backed reporting system that turns citizen reports across 4 civic issue types (potholes, overflowing waste, streetlights, drainage) into prioritized intelligence for municipal authorities.
- Implemented AI-based image/incident analysis with severity and risk scoring and confidence-based validation; extracted EXIF metadata with a 2-tier location fallback (GPS, then user-provided) and location-confidence-based acceptance.
- Devised duplicate-incident handling so repeat reports raise priority instead of inflating counts, plus civic impact scoring based on severity and affected population.
- Constructed an intelligence engine combining 5 signal types (current reports, previous reports, risk, confidence, historical signals) and a 2-stage verification workflow (field-worker photo, then municipal) feeding a dashboard.

TrapMate | Online multiplayer strategy board game Jun 2026 – Present

- Architected a full-stack Next.js/React application from scratch, designing 15+ gameplay mechanics and the core system architecture.
- Established backend APIs with PostgreSQL and Prisma, authentication, and real-time multiplayer with game-state synchronization.
- Delivered 6+ backend-driven modules, including matchmaking, room management, player profiles, tournaments and leaderboards, plus an offline bot mode.
- Created a responsive frontend with 25+ interactive screens and reusable React components, refined through 30+ testing and debugging iterations.

ECDAT | Data analysis and risk intelligence platform SIH 2026 Shortlisted • Data / AI

- Wrote a FastAPI (Python) backend with a 3-stage pipeline (processing, cleaning, data-quality analysis) integrated with a frontend dashboard.
- Applied algorithm-based risk analysis and surfaced results through dashboard visualizations, including a Quantum Risk Overview.

SatQuery | Satellite / space-data web application Full Stack • In development

- Shaping the frontend architecture and implementation of a web platform for querying satellite and space-related data.
- Assembled 3 core experiences (home, authentication/sign-in, settings) as one cohesive application, with interactive components and a dark-mode rotating-Earth interface.

EDUCATION

B.E. (Hons.) Computer Science & Engineering – Artificial Intelligence (Microsoft Track) Expected Aug 2029
Chandigarh University, Mohali, Punjab, India | 3rd Semester
Class XII – Police DAV Public School, Punjab, India
Class X – Innocent Hearts School, Punjab, India

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) – Score: 928/1000

LEADERSHIP & ACTIVITIES

Engineering Community | Social Media Manager → Promotions Manager Jan 2026 – Present

- Managed social media, content and community communication for 6 months (Jan–Jul 2026); now lead promotions and community outreach.

Event Lead | SHE Captures – HERizon 1.0: coordinated a 2-day event, March 27–28.
Hackathons
SIH 2026: ECDAT, shortlisted through the selection process.
ByteBuild 1.0: participated with SANKET × CivicLens.
